## HONEY MARKET FOR THE MONTH OF NOVEMBER, 2003 IN VOLUMES OF 10,000 POUNDS OR GREATER UNLESS OTHERWISE STATED

- REPORT INCLUDES BOTH NEW AND OLD CROP HONEY -

Prices paid to beekeepers for extracted, unprocessed honey in major producing states by packers, handlers & other large users, cents per pound, f.o.b. or delivered nearby, containers exchanged or returned, prompt delivery & payment unless otherwise stated.

- ARKANSAS** - Soybean, light amber, \$1.25
- CALIFORNIA** - Buckwheat, extra light amber, \$1.33-1.49  
- Cotton, light amber, \$1.24-1.49 - - - amber, \$1.19-1.24  
- Cotton/Alfalfa, light amber, \$1.10-1.15  
- Mixed Flowers, extra light and light amber, \$1.15  
- Orange, white, \$1.50  
- Sage, white, \$1.41-1.50  
- Wildflowers, light amber, \$1.14-1.24
- COLORADO** - Alfalfa, amber, \$1.24-1.25
- FLORIDA** - Gallberry, extra light amber, \$1.35\* - - - cut comb, \$1.50\*  
- Orange Blossom, white, \$1.60\* - - extra light amber, \$1.50\*  
- Saw Palmetto, extra light amber, \$1.40\*
- \*All deliveries were from previous contracts...
- GEORGIA** - Floral Source Not Reported, light amber, \$1.25
- IDAHO** - Alfalfa, extra light amber, \$1.39  
- Alfalfa, light amber, \$1.24-1.39 (small lot 94¢)
- KANSAS** - Clover, light amber, \$1.34 - - - amber, \$1.25
- LOUISIANA** - Floral Not Reported, light amber, \$1.25
- MICHIGAN** - Floral Not Reported, light amber, \$1.35
- MONTANA** - Clover, white, \$1.52-1.54  
- Floral Not Reported, light amber, \$1.25

<b>NEBRASKA</b>	- Alfalfa, light amber, \$1.37
<b>NORTH DAKOTA</b>	- Alfalfa, extra light amber, \$1.48 - Clover, white, \$1.35-1.50 - - - extra light amber, \$1.35 - Sunflower, extra light amber, \$1.50 - - light amber, \$1.35 - Floral Not Reported, white, \$1.50
<b>OREGON</b>	- Alfalfa, extra light amber, \$1.34-1.49 - Raspberry, extra light amber, \$1.42 - Mint, amber, \$1.19
<b>SOUTH DAKOTA</b>	- Clover, white, \$1.40-1.50 - - Melter, dark amber, 40¢ - Sunflower, extra light amber, \$1.48-1.50 - Sunflower, amber, \$1.30 - Floral Not Reported, light amber, \$1.25
<b>UTAH</b>	- Alfalfa, light amber, \$1.19-1.24 - - - amber, \$1.14-1.19
<b>WASHINGTON</b>	- Alfalfa, extra light amber, \$1.45 - - - light amber, \$1.18 - Fireweed, extra light amber, \$1.50 - Mint, light amber, 91¢ - Peppermint, light amber, 98¢ (small lot)
<b>WISCONSIN</b>	- Clover, white, \$1.45-1.50

Prices paid to Canadian beekeepers for unprocessed bulk honey by packers & importers in U.S. currency, f.o.b. shipping point, containers included unless otherwise stated. Duty & crossing charges extra. Cents per pound.

<b>ONTARIO</b>	- Floral Not Reported, extra light amber, \$1.49
----------------	--

Prices paid to importers for bulk honey, duty paid, containers included, cents per pound ex-dock or point of entry unless otherwise stated.

<b>EAST COAST..... ARGENTINA</b>	- Floral Not Reported, white, \$1.50
<b>ARGENTINA</b>	- Floral Not Reported, extra light amber, \$1.35
<b>BRAZIL</b>	- Mixed Flowers, light amber, \$1.06 - 1.20
<b>BULGARIA</b>	- Mixed Flowers, extra light amber, 1.37
<b>MEXICO</b>	- Mixed Flowers, extra light amber, \$1.37
<b>MEXICO</b>	- Mixed Flowers, light amber, \$1.14
<b>TURKEY</b>	- Mixed flowers, light amber, \$1.31
<b>WEST COAST..... CHINA</b>	- Wildflowers, extra light amber, \$1.02
<b>VIETNAM</b>	- Mixed Flowers, light amber, \$1.08

## **COLONY, HONEY PLANT & MARKET CONDITIONS DURING NOVEMBER**

### **APPALACHIAN DISTRICT – (MD, PA, VA, WV) OOO**

Colonies have been winterized and/or moved to warmer locations in the south for the winter. After several weeks of above normal temperatures, more seasonable temperatures have blanketed the area. Local associations are preparing for winter annual meetings. Next report will be issued March, 2004.

### **CALIFORNIA OOO**

The month began with fall-like weather over the State with high humidity and precipitation which brought much needed relief to fire fighters in Southern California. On the 8<sup>th</sup> & 9<sup>th</sup>, a severe weather system moved into the northern half of the State bringing thunderstorms and rain, funnel clouds and cooler temperatures. Areas that were setting record-highs a few weeks ago were not reporting temperatures as much as 9-11 degrees below normal. Another round of storms moved in the middle of the month. This time they brought more strong thunderstorms to Southern California. On the 15<sup>th</sup>, over 5" of rain fell in a section of Los Angeles. Southern California had a few days of above normal temperatures with highs in the 80's around the 19<sup>th</sup> & 20<sup>th</sup> but by the 22<sup>nd</sup> the San Joaquin Valley was dropping to near freezing and Santa Barbara recorded 32 degrees on the 23<sup>rd</sup>. The month ended with additional storm systems that brought snow to the mountains and freezing temperatures to the central valley.

The wildfires continued into the first part of November but cooler temperatures, higher humidity and occasional showers aided in finally getting them put out.

The bees are reported to be in fairly good condition but mite infestations late in the summer weakened some colonies. Widespread feeding of syrup and patties was reported across the State. Bees are now sitting in holding yards until after the 1<sup>st</sup> of the year. Migratory beekeepers moved their bees into the State during November. Most of them were fed just before Thanksgiving. There are already concerns that there could be a shortage of bees to pollinate the almonds next year. Losses from mites and wildfires will likely cause the shortage but with honey prices being higher than usual, beekeepers could be looking for pollen and nectar sources rather than move them into almonds.

Beekeeping supply businesses reported excellent sales for November because beekeepers got more money for their honey this year. They are buying foundation, supers and new equipment. Small amounts of wax were occasionally traded for supplies.

Sales of packaged honey products varied from good to fair. Packers didn't purchase a lot of honey during November because they had stocked up earlier or are taking honey from previous commitments.

### **GEORGIA OOO**

Colonies around the state were in generally good condition. Most beekeepers around the state fed sugar and/or corn syrup to their colonies to a greater extent than normal due to the poorer than normal honey flow this year. Colonies are nearing the bottom of the cycle of population reduction. There were no significant sources of pollen or nectar available as November ended. Weather during November was warmer than normal for most of the month but became more seasonal with cool days and cold nights as the month neared its end. Moisture levels around the state remained adequate.

### IDAHO OOO

Apiarists have been feeding the bees pollen and syrup and getting the hives ready to move to California. Some have been sent already, others will wait until December or January. The bees seem to be in fairly good condition, however, the hives are not being opened and they aren't flying around. Some of the hives are being moved to protective storage with controlled air circulation to protect them from the winter.

### ILLINOIS OOO

The fall honey flow was the worst in twelve seasons according to one beekeeper. Supplemental feeding activities were beekeepers main activity throughout the month.

Temperatures were above normal throughout the state. Some light rainfall and light snowfall was reported the last of the month. A killing, hard freeze the last of the month eliminated the remaining light supplies of goldenrod and aster.

Honey movement was reported good due to demand for local honey. Quality of honey offered was not as good a quality as normal years due to the dry conditions.

### INDIANA OOO

Most beekeepers treated their colonies and moved them into winter yards. The fall honey crop was very light due to dry weather conditions in most of the state. Temperatures for the month were above seasonal normals. Most beekeepers fed colonies with candy boards and sugar water due to very little honey stores in the hives.

Demand for honey was reported good for locally collected honey. Bulk honey movement was slow due to limited stores in beekeepers hands.

### MISSISSIPPI OOO

Colonies around the state were in good condition. In the southern portion of the state, a few colonies were fed with corn syrup while most colonies continue to sustain themselves with stored honey. In the central portion of the state, some colonies were fed sugar syrup, while in the northern portion of the state colonies were generally sustaining themselves with previously stored honey. Throughout the state, populations of honeybees continued to decline. During the month there was only very limited availability of pollen from domestic flowers in the southern portion of the state. Otherwise there were no significant pollen or nectar sources available in the state. As the month ended, the weather featured cool days and cold nights with moisture levels adequate.

### MONTANA OOO

The month began with record low temperatures in several locations across the state. Lows ranged from minus-10 in Great Falls to minus-22 in West Yellowstone. On the 11<sup>th</sup>, Glasgow finally rose above the freezing mark ending an 11-day run of temperatures below 32 degrees. It turned cold again and on the 23<sup>rd</sup>, many places reported temperatures as low as minus-20 degrees. Some rain and snow was recorded across the state but the greatest amount was only 1.92" which only helped topsoil conditions. At the end of the month, subsoil moisture was rated at 51% very short compared to 26% last year.

Bees spending the winter in Montana are packed away and won't be checked on because of the cold temperatures. Migratory beekeepers took their hives to California holding yards for the winter. They are reported to be in good condition as they were loaded on the trucks.

**NORTH CAROLINA OOO**

The month of November has been fairly mild for the state of North Carolina, with unusually warm weather. This gave beekeepers that were behind a chance to catch up on medicating and feeding. There was a drastic drop in temperatures by the third week in November, however, and many areas had heavy frost. The fall honey flow was very low this year, causing a shortage in available honey supplies. Most honey for retail market is now in the stores, with no reserves. According to the NC Apiary Specialist, the hives are looking reasonably well at this point going into the winter months. Beekeepers are getting ready for next year with repairing equipment, checking for mites and supplemental feeding. Apiary Specialists have been checking for diseases and the hives seem to be in fairly good shape. Many of the beekeepers are getting ready for pollination contracts.

**OREGON OOO**

The month began with cold temperatures across the state. A few areas along the coast and in the Willamette Valley received significant precipitation but everywhere else remained essentially dry. Light snowfall was reported in the mountains. The cold temperatures delayed some fall planting. Temperatures warmed slightly into the mid-40's to low 50's during the day but continued to drop below freezing at night. Snow again fell in many areas of the state but only ended up being about an inch. The week ending the 24<sup>th</sup>, winter-like conditions were again reported with cold temperatures, heavy frost, rain and snow in the mountains. Thanksgiving weekend was fairly mild.

Bees are going into winter in good condition this year. Beekeepers that take their colonies to California for almond pollination in January now have them sitting in holding yards where they are stacked and wrapped with tar paper. Beekeeping association meetings were also held during November.

**UTAH OOO**

The bees are in pretty good shape. They have a fair supply of honey on them but those that haven't been sent to California will probably have to be fed when they get down there. Their honey crop looks to be close to average.

**WASHINGTON OOO**

Below average temperatures were reported across the state the first 10 days of November and several weather systems brought rain, snow and the first killing frost of the fall. While Central and Eastern Washington are used to the cold temperatures, the west-side of the state rarely gets below freezing. From the third to the sixth, Seattle had record low temperatures of 30-31-30 degrees. A few days later, temperatures got even colder with nighttime lows on the west-side dropping into the low 20's and into the single digits in Central and Eastern Washington. In the southeast corner of the state, this is 10-15 degrees below normal. Conditions were mostly dry during this time with the majority of the rain falling in the mountains. In a complete turn-around, parts of southeastern Washington recorded record high temperatures of 60 and 57 on the 18<sup>th</sup> and 19<sup>th</sup>. Beneficial snow and rain fell in Eastern Washington with some areas reporting 3" or more. Seattle set a daily-record rainfall total on the 18<sup>th</sup> and from the 15-20<sup>th</sup> they accumulated 2.06". On the 19<sup>th</sup>, Spokane recorded wind gusts of 62 mph and a day later, set a daily-record for snowfall when they received over 8". Two additional storms hit Spokane bringing them another 12-16". Temperatures warmed again over the Thanksgiving holiday. On the 28<sup>th</sup>, Walla Walla reached 61 degrees. Precipitation accompanied the warm temperatures in Western Washington setting records of 6.03" along the coast.

**WASHINGTON continued...**

Despite the occasional cold temperatures in Western Washington, there were also days warm enough for the bees to get out for cleansing flights. They were also able to collect a little pollen and nectar from filbert trees and heather. Colonies were checked frequently and feed was added when necessary. Some migratory beekeepers hauled their last loads to California during November. Others that had their bees already sitting in winter holding yards went down before Thanksgiving to check on their bees and to add supplemental feed when needed.

**WISCONSIN 000**

Weather conditions most of the month were normal with normal snowfall in the northern section and very light snow in the southern section. The honeybees had numerous cleansing flights due to warming temperatures part of the month.

Beekeepers reported most beekeepers had been feeding sugar water or candy boards due to the low honey stores in their hives.

Commercial demand continued to be slow due to limited offerings. Retail demand continued to be good due holiday demand.
